## Chemical Manufacturing

AquaPhoenix chemicals and reagents are manufactured at our Hanover, Pennsylvania facility. Our packaging includes a wide variety of sizes ranging from single dose packets to 20 L cubitainers. Most chemicals are induction sealed, taped or shrink wrapped to prevent leaks and spills. We also offer the option of placing chemicals in a poly bag to further prevent any leaks. These items are handled by our in-house, certified experts to confirm packages are shipped according to HM-126F, Dangerous Goods Regulations.

Our priority is delivering quality products and outstanding service. The company's ISO 9001:2008 certification is just one more way to define the high standards that differentiate us from our competitors. In addition, commitment to safety is a common thread that runs throughout all levels of our organization. From the products we design, produce, package and deliver, to the environment in which we operate, safety takes priority.

### We Focus on Quality!

ISO 9001:2008 specifies that an organization demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements. It aims to enhance customer satisfaction through the effective application of the processes and emphasizes a focus on continual improvement.

### Customize Your Products with Private Labeling

Private labeling is a great way to build brand loyalty with your customers. By placing your company logo and unique product codes on your private-labeled reagents, you are increasing your brand awareness. We offer private labeling with no minimum quantity requirements and at no additional cost.
