# Reduce Your Laboratory's Chemical Footprint

Reduce the amount of solvent orders placed and solid waste generated in your lab by replacing smaller bottles with 20L containers.

If you use large amounts of solvents and want to reduce your lab's environmental footprint, try **Fisher Chemical** reusable containers for volumes up to 200L. One 200L container replaces fifty 4L bottles, significantly reducing the amount of storage space needed.

These ACS-grade solvents are available in 20L containers:
