

# Enhance Safety in Your Clinical Lab Work Environment

**Safety**

Protecting What Matters Most

Today's challenges put your clinical and diagnostic laboratory safety program objectives to the test. Rely on the Fisher Healthcare team to help you find the resources and products you need to keep your program up to date.

## Injuries and Hazard Exposures

We understand the challenges of keeping your scientists, technicians, workers, and patients safe. Through use of the latest in personal protective products, you can help create a barrier between your personnel and hazards in the laboratory work environment.

### Personal Protective Equipment

### First Aid and Medical

### Slips and Fall Protection

## Hazardous Materials Management

You refer to the laboratory safety section of your safety program for guidance on how to enhance your lab's management of hazardous chemicals and environmental challenges. Two portions of your safety program to take particular note of are recent OSHA updates to the Global Harmonized System (GHS-2021) and to chemical labeling and control regulations.

### Hazardous Materials Storage

### Spill Control and Containment

### Environmental Monitoring

## Facility Safety Innovations

In light of recent trends to update, upgrade, and renovate clinical and diagnostic laboratories with new processing technologies, this may also be a good time to update your safety program's facility safety objectives.

### Facility Safety and Maintenance

### Pedestrian Safety

### Fire and Emergency Response

### Controlled Environments

Contact a Fisher Healthcare safety specialist or account manager to learn more about available safety essentials and resources and how you could benefit by taking advantage of Vizient, Premier, and other group purchasing organization pricing.
