

Reduce your lab's waste by 50% while providing extra protection during storage.

The Biotix CleanPak reload is easy to use and has a simple design that reduces the amount of packaging waste. The bag is hermetically sealed to better protect against contaminants during transport and while being stored.

- Color-coded snapcards by tip volume for easy identification.
- Resealable bag design for protected tip storage.
- Reduces plastic waste by 50% when compared to racked tips.

Pipette tip racks are fully autoclaveable at 121° C after transfer from reload.

### Step 1: Open Bag

Tear the strip at the top of the bag and remove the protective cover.

### Step 2: Transfer Refill

You will hear a click when the snapcard is secured.

### Step 3: Replace Lid

Replace lid in the bag and keep it with unused inserts.

### Step 4: Seal for later use
